rev. 04/14

## Wuskwatim Generating Station Access Road

## Access Road Restrictions

**WUSKWATIM**  
Power Limited Partnership

## What is the Wuskwatim access road?

- The Wuskwatim access road is a 48-kilometre all-weather gravel road developed to access the Wuskwatim Generating Station.
- The access road will continue to provide year-round access for Operations and Maintenance staff.

## Who owns the road?

- The access road is owned and operated as a private road by the Wuskwatim Power Limited Partnership (WPLP), a limited partnership between the Nisichawayasihk Cree Nation (NCN) and Manitoba Hydro. It was created to build and operate the Wuskwatim Generating Station.

## Why are access restrictions in place?

- To provide safe, coordinated access to Wuskwatim Generating Station for authorized users.
- To support sustainable use through the protection of the area's natural resources.
- To support the preservation of the socio-economic, cultural, spiritual and heritage values of NCN.

## How long will the access restrictions last?

- The access road will continue to be operated under private ownership of WPLP, and will be adapted and revised as necessary.

## Who can use the road?

- Operations and Maintenance staff and management, as authorized by the Plant Manager;
- NCN members for ceremonial purposes, when authorized by the Plant Manager in consultation with the NCN Implementation Coordinator;
- Emergency vehicles/personnel and regulators;
- NCN resource harvesters, including Wuskwatim Lake commercial fishers, trapline holders and helpers, and traditional resource harvesters, when authorized by the Plant Manager in consultation with the NCN Resource Coordinator.

## Under what conditions can others use the road?

- When authorized by the Plant Manager, others such as schools, the public and media, may be granted access for formal tours of the site.

## How are control measures enforced?

- Control measures are enforced by an automated security gate located just south of the intersection of the Wuskwatim access road and PR 391.
- The automated security gate will operate 24-hours per day, seven days per week. Access outside regular operating hours will be limited to staff with pre-approved access cards.
- Operation staff will maintain a list of authorized road users and only those individuals will be permitted access.
- Random patrols will be conducted to monitor unauthorized use of the access road, whether through the use of snow machines or ATVs.
