## Wuskwatim Generating Station Access Road

# Access Road Restrictions

## What is the Wuskwatim access road?

- The Wuskwatim access road is a 48-kilometre all-weather gravel road developed to access the Wuskwatim Generating Station.
- The access road will continue to provide year-round access for Operations and Maintenance staff.

## Who owns the road?

- The access road is owned and operated as a private road by the Wuskwatim Power Limited Partnership (WPLP), a limited partnership between the Nisichawayasihk Cree Nation (NCN) and Manitoba Hydro, created to build and operate the Wuskwatim Generating Station.

## Why are access restrictions in place?

- To provide safe, coordinated access to Wuskwatim G.S. for authorized users;
- To support sustainable use through the protection of the area's natural resources; and
- To support the preservation of the socio-economic, cultural, spiritual and heritage values of NCN.

## How long will the access restrictions last?

- The access road will continue to be operated under private ownership of WPLP, and will be adapted and revised as necessary.

## Who can use the road?

- NCN members for Ceremonial purposes, when pre-authorized by the Department Manager in consultation with the NCN Implementation Office \*\*;
- NCN resource harvesters, including Wuskwatim Lake commercial fishers, trapline holders and helpers, and traditional resource harvesters, when pre-authorized by the Department Manager in consultation with the NCN Implementation Office \*\*;
- Operations and Maintenance staff and management, as authorized by the Department Manager; and
- Emergency vehicles/personnel and regulators.

**\*\* Prior approval required**

## Under what conditions can others use the road?

- When authorized by the Department Manager others may be granted access for formal tours of the site (e.g., school, public and media tours).

## How are control measures enforced?

- Control measures are enforced by an automated security gate located just south of the intersection of the access road and PR 391;
- The automated security gate will be in operation 24 hours per day, seven days per week, access outside regular operating hours (7:00 AM - 6:30 PM) will be limited to staff with pre-approved access cards;
- Operation staff will maintain a list of authorized road users and only those individuals are permitted access; and
- Random patrols will be conducted to monitor unauthorized use of the access road.
